

## **Research Article Title**

### **Author(s) Name(s)**

Affiliation(s), Address

Email Address(es)

**Corresponding author's details** [Full Name, Affiliation, Orcid ID and Email Id]

---

## **Abstract**

The abstract should provide a concise summary of the research, including the objectives, methods, key findings, and conclusions. It should be between 150-250 words.

---

## **Keywords:**

Keyword 1, Keyword 2, Keyword 3, Keyword 4, Keyword 5

---

## **Introduction**

The introduction should present the background of the study, the research question, and the objectives. It should also briefly review relevant literature and explain the significance of the study.

---

## **Methods**

### **Study Design**

Describe the overall design of the study, including the type of research (e.g., qualitative, quantitative, experimental, observational).

### **Participants/Subjects**

Detail the population or sample used in the study, including the number of participants, selection criteria, and any relevant demographic information.

### **Data Collection**

Explain the methods used to collect data, including any instruments, tools, or procedures employed.

### **Data Analysis**

Describe the statistical or analytical techniques used to process the data.

---

## **Results**

Present the findings of the study, using tables, figures, and text. Ensure that the results are organized in a logical sequence and that all data are clearly presented.

**Table 1: Description of Data**

Variable	Group A	Group B	p-value
Data 1	Value	Value	Value
Data 2	Value	Value	Value

**Figure 1: Example Graph of Results**

Insert Figure 1 here

---

### **Discussion**

Interpret the findings of the study, comparing them to previous research, explaining their implications, and noting any limitations. Discuss how the results contribute to the existing body of knowledge and suggest potential directions for future research.

---

### **Conclusion**

Summarize the key findings and their significance. Provide a brief statement on the potential impact of the study and any recommendations for further research or practice.

---

### **Acknowledgments**

Thank any individuals or organizations that contributed to the study but do not meet the criteria for authorship. Include funding sources, if applicable.

---

### **Conflict of Interest Statement**

Declare any conflicts of interest that may have influenced the research, authorship, or publication of the article.

---

### **Informed Consent Statement**

Informed consent was obtained from the participant involved in this study.

### **Authors' Contributions**

All authors have contributed equally to this work and have reviewed and approved the final manuscript for publication.

### **Financial Disclosure**

No financial support was received for the writing, editing, approval, or publication of this manuscript.

**Consent for Publication**

Informed consent for publication was obtained from the patient involved in this case report, as documented in the manuscript.

**Ethical Statement**

This project was exempt from IRB review as it did not qualify as human subject research under federal regulations.

---

**References**

List all references cited in the manuscript, formatted according to the journal's preferred citation style (e.g., APA, MLA, Chicago). Ensure that all in-text citations are included in the reference list and vice versa.

1. Author(s). (Year). Title of the article. Journal Name, Volume(Issue), Page Numbers. DOI
  2. Author(s). (Year). Title of the book. Publisher.
- 

**Supplementary Material**

Include any supplementary material such as additional tables, figures, or data sets as separate files. Reference these materials in the main text as Supplementary Table 1, Supplementary Figure 1, etc.
